Education

2010 - 2012	**MSc Embedded Systems**	*Delft University of Technology*

Research field: Computer Vision
Degree received with distinction, Average grade: 8.5 out of 10

2006 - 2010	**BSc Electrical Engineering**	*Delft University of Technology*

Degree received with distinction, Average grade: 8 out of 10

Work Experience

Jan. 2019 – Current Fulltime	**Unit Head Electrical and Instrumentation**	*Allseas Engineering*

As Unit Head within the innovations department, I am the daily supervisor of the newly founded E&I Unit. My team is responsible for the Electrical Power Engineering, Electrical outfitting and custom sensor development for Allseas' biggest Heavy Lifting equipment.

Jan. 2016 – Dec 2018 8 hours a week	**Freelance IT Consultant**	*FTE Consult*

I was asked to co-develop an application for KPMG as an Independent contractor. Responsible for the agile Project Coordination, Technical Architecture, and development of the C# backend of the web-portal.

Sep. 2015 – Dec 2018 Fulltime	**Research and Development Engineer**	*Allseas Engineering*

R&D Engineer in the innovations department, focusing on Computer Vision and Embedded Software. Responsible for Electrical modifications, Software Architecture, Software Development, DevOps and Testing for multiple off-shore motion-compensated lifting systems.

Apr. 2014 – Aug. 2015 Fulltime	**Intelligent Computing Technical Architect**	*Accenture*

Team lead of Dutch department of the Intelligent Computing team, which focusses on Cognitive Computing and Video Analytics. Responsible for managing technology pilots, software architecture and development, supervising new hires, go-to-market activities and technology assessments.

| Jan. 2013 - Apr. 2014
Fulltime | **Junior Business & IT Consultant** | *Accenture* |

Supported the Business Information Management team at a Dutch ministry in maintaining the application supporting the primary business process of the department that is responsible for granting subsidies. Responsible for helpdesk supervision, business analysis and project management.

| Jan. 2012 - Sept. 2012
Fulltime | **Graduate intern** | *Scarabee Systems & Technology* |

Research in Computer Vision: successfully developed an program which real-time examines the "conveyability" of baggage in airports, using point cloud models generated with video footage from a depth camera.

| June 2007 - Jan. 2010
10 hours a week | **Web developer** | *Dijksman.com* |

Responsible for the interactive functionalities of client websites at an IT start-up focusing on public services.

Extracuricular Activities

| Sept. 2011 - Aug. 2012
2 hours a week | **Budget and Finance Committee** | *Electrotechnische Vereeniging* |

Supervising the bookkeeping and budgets of the association including its subcommittees. Advising the board and general assembly in financial matters.

| Feb. 2011 - Nov. 2011
8 hours a week | **Board, Chairman** | *IEEE Student Branch Delft* |

Responsible for redefining the association's goals, thereby reviving the association after a long period of inactivity.

| Sept. 2009 - Aug. 2010
40 hours a week | **Board, Commissioner of Education** | *Electrotechnische Vereeniging* |

Responsible for the evaluation cycles of the Electrical Engineering BSc and related MSc programs at the TU Delft. Student representative towards the faculty and consultant to the committee of curricular changes. Accountable for e.g. the book sales, a symposium, an international exchange and the renewal of the association's branding.

| Feb. 2008 - June 2008
2 hours a week | **International Contacts Committee, Treasurer** | *EESTEC LC Delft* |

Responsible for the finances and sponsoring of an international exchange.
